Notification of Extraordinary Loss and Revision to Full-Year Results Forecast for the Year Ended December 2009

1. Revision to Results Forecast (1.1.2009 – 31.12.2009)

GMO Internet, Inc. announces the following revisions to its consolidated results forecast for the fiscal year ending December 2009 (01.01.2009–12.31.2009). The previous forecast was issued on November 9, 2009 in the document entitled Revision to Results Forecast for Fiscal Year Ending December 2009.

(1) Revision to Consolidated Results Forecast for Fiscal Year Ending December 2009

(Unit: yen millions)

	Sales	Operating Profit	Ordinary Profit	Net Profit
Previous Forecast (a) (November 9, 2009)	38,000	4,600	4,500	2,200
New Forecast （b）	38,195	4,649	4,797	1,354
Amount of Change （b-a）	195	49	297	-846
Percentage Change	0.5％	1.1％	6.6％	-38.5％
(Reference) Actual results in the previous term (FYE 12/2008)	37,247	4,143	4,031	2,111

(2) Reasons for Revision

We expect earnings in the Web Infrastructure and Ecommerce segment to come in more or less in line with November forecasts. Slight upward adjustments were made to sales and operating profits of 195 million and 49 million yen respectively (new sales forecast: 38.195 billion yen, new operating profit forecast: 4.649 billion yen).

In regard to ordinary profit, due to interest income not reflected in initial forecasts, and other factors we have revised forecasts upward 297 million yen to 4.797 billion yen.

As discussed in the following section (2. Extraordinary Loss to be Posted) an expected disposal loss (1.47 billion yen) on investment real estate owned by the company will be reported as an impairment loss. As a result of this and other factors, we revise our net profit forecast downward 846 million yen to 1.354 billion yen.

The above forecast revisions do not impact dividend forecasts.

2. Extraordinary Loss to be Posted

In investment real estate owned by the company, the book value of a property planned for sale was reduced to the net sale amount and that amount (1.47 billion yen) will be posted as an impairment loss.

These forecasts are based on information available at the time of release and include factors that are largely indeterminable. Actual results may vary from the projected figures as a result of changes in business conditions and other causes.
